Series Circuits: Components connected end-to-end; the same current flows through each. Total resistance: $R_{\text{total}} = R_1 + R_2 + R_3 + \dots$. Voltage divides among components.

Parallel Circuits: Components connected across the same voltage source; currents split. Reciprocal of total resistance: $1/R_{\text{total}} = 1/R_1 + 1/R_2 + 1/R_3 + \dots$. Voltage across each branch is the same.

Kirchhoff's Laws

Kirchhoff's Current Law (KCL) The total current entering a junction equals the total current leaving.

Kirchhoff's Voltage Law (KVL) The sum of voltages around any closed loop equals zero.
