How do you handle accounting for depreciation?

Answer: Depreciation is the systematic allocation of the cost

of a tangible asset over its useful life. It reflects the consumption of an asset's value over time. Common methods include:

- Straight-Line Method:** Expenses an equal amount each year.
Formula: $(\text{Cost} - \text{Salvage Value}) / \text{Useful Life}$
- Declining Balance Method:** Expenses more in early years, decreasing over time, often using a fixed rate multiplied by the book value.
- Units of Production Method:** Based on usage or output.
